PLANTING TABLE

For Circular Beds For All Bedding Plants

At 6 inches apart, commence outside row 3 inches from edge of circle; if 12 inches apart, then 6 inches from edge, etc. It is important to make the outer rows compact, although the inner rows may be more openly spaced. The table here is for circular beds, but if square will require about the same number of plants. An oval bed may be compared to a diameter found by adding length to breadth and dividing by 2.

CHOICE EVER-BLOOMING TEA ROSES

For Outdoor Bedding or Indoor Pot Culture

PRICE, YOUNG PLANTS, 15c EACH; 12 FOR $1.50. TWO-YEAR-OLD PLANTS, FROM FOUR-INCH POTS, 40c EACH; 12 FOR $4.00.

THE ROSES in this collection are highly valued because of their fine colors and exquisite tea fragrance. They will bloom freely from June until November. Some of them are particularly famous for the large size, beauty and brilliant colors of the bloom. If planted in the spring so that they may become thoroughly established during the summer, they will, with few exceptions, prove hardy here, with protection during the winter. They are the product of years of experience and our improved methods of culture, which insure plants of the greatest possible vitality and abundance of bloom.

Alexander Hill Gray Color is deep lemon-yellow which intensifies as the blooms develop; flowers large, of great substance and perfect formation; it has a high-pointed center from which the petals gracefully reflex. We recommend it highly.

Bridesmaid The most popular pink Tea Rose. Thousands of this variety are grown every year for cut flowers, and it is also very desirable for summer bedding out of doors. It is a delightful shade of bright pink, very free flowering and easily grown.

Blumenschmidt Pure citron-yellow, outer petals edged tender rose, a sport from Franzisca Kruger, which it resembles in form, and which has a more vigorous growth. Winner of three first premiums.

Clothilde Soupert Color a French white, deepening to a rosy-blush in the center, exceeding in distinctness of shadings the well known Malmaison. Its greatest value lies in its compact, vigorous habit and wonderful profusion of bloom. Form and substance of the flowers are so perfect that the hottest weather does not cause a deterioration of either, so that even in mid-summer a bouquet of splendid buds and open flowers can be obtained from this variety. Hardy with protection.

Etoile de Lyon This magnificent Tea Rose, south of the Ohio river, has proved to be perfectly hardy. Blooms in the greatest profusion and each bud is a gem. Flowers are very large, double, full and deliciously fragrant. The color is a beautiful chrome-yellow, deepening at center to pure golden-yellow.

Mlle. Franzisca Kruger The striking color of this handsome Rose places it at once in the front as a bud producer in the open air. In its shading of deep coppery-yellow it stands unique and distinct from all others. The flower, wnen open, is of good size and very symmetrical. One of the finest Roses to plant in masses and clumps.

Helen Good, the Beauty Cochet This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good as, it not better than, any Rose for the garden ever sent out. The color is white suffused with pink, each petal edged deeper.

Lady Hillingdon Handsome flowers of clear apricot yellow; hardy; of much vigor, and with an autumn blooming habit.

Marie Guillot This beautiful Tea Rose continues in popular favor, and still maintains its position as one of the best white Roses of its class; flowers of an unusual style, entirely double to the center; very sweet scented.

Souvenir de Pierre Notting The bloom is very large, perfectly full, elegant form; has a beautiful long bud; the colors are very bright, distinct and clear and have no unpleasant tones—orange-yellow, bordered in carmine-rose.

The Bride The buds are very large and of exquisite form; the petals are of fine texture and substance, and the full flower is very double measuring from three and one-half to four inches in diameter. The color is a delicate creamy-white. The blooms can be cut with long stems and will last in a fresh state being cut longer than any known variety.

Alexander Hill Gray.

Helen Good.

Our "Giant" Collection of Large TWO-YEAR-OLD EVER-BLOOMING ROSES

These bushes are two years old, strong and healthy. They make of course more appearance from the first than does the smaller stock having practically a year the advantage in all respects; an advantage for which we find many persons willing to incur the additional expense.

OUR ROSE PLANTS are all grown on own roots and guaranteed true.

The selection of varieties must be left to us, and we will send only strictly high-grade Roses. All will be different, and all correctly labeled.

HARDY JUNE ROSES, Hybrid Perpetuals

Price, Plants from 2½-inch pots, 15 cents each, $1.50 per dozen. Two-year-old Plants from 4-inch pots, 40 cents each, $4.00 per dozen, except where noted.

Though called Perpetual, it must be understood that they are not such early and constant bloomers as the ever-blooming Rose. The Hybrid Perpetuals should not be ordered for house culture as they are not suitable for that purpose. These Roses are especially suited to plant in all the Northern states and territories, also in the colder parts of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, etc.

American Beauty Flowers very large, of beautiful form and very double; color a deep, rich rose. The fragrance is delightful, resembling La France. A true ever-bloomer, each shoot producing a bud. This popular Rose is too well known to need further description. **Price, small plants, 20 cents each; strong plants, from 4-inch pots, 45 cents.**

Conrad F. Myer This magnificent new Rose is perfectly hardy and blooms all through the summer and fall. The flowers are four inches across, perfectly full and double. The color is clear flesh-pink, with bright red center; it is very sweet and has the delightful fragrance of the **Wild Rose or Sweetbriar.** It is extremely free from the attacks of insects, rust or blight. This is certainly a grand variety.

Frau Karl Druschki, or White American Beauty This is undoubtedly one of the grandest hardy pure white Roses ever introduced. Makes splendid buds and immense flowers four to five inches across, perfectly double and delightfully fragrant, large, thick petals, very double and handsome. Bright, shining green leaves, elegantly veined; a healthy, vigorous grower, entirely hardy and a constant and abundant bloomer.

General Jacqueminot A rich velvety crimson.

Gloire de Lyonaise This grand Rose is the only yellow Hybrid Perpetual that has been produced. It cannot be called deep yellow, but rather a pale shade of chamois or salmon-yellow deepest in center, sometimes passing to a rich creamy-white, finely tinted orange and fawn.

J. B. Clarke A vigorous grower with handsome foliage, deep red on the young shoots, changing to deep green with age; a free perpetual bloomer; color brilliant crimson shaded scarlet; very large and of exquisite form, with large smooth, petals slightly reflexed on the edges; does not burn in the sun; very fragrant.

Magna Charta A bright, clear pink, flushed with crimson; very sweet, flowers extra large, with fine form and very double.

Mme. Charles Wood Color very bright, rich cherry-red; blooms the first season and all the time, and is delightfully fragrant. May be called an ever blooming Hybrid Perpetual.

Paul Neyron Deep shining rose, very large.

HARDY CLIMBING ROSES

Price, plants from 2½-inch pots, 15 cents each; $1.50 per dozen. Two-year-old plants from four-inch pots, 40 cents, $4.00 per dozen.

These beautiful new Hardy Climbing Roses are unexcelled. There is nothing like them, after they become established, in their strong, luxuriant growth, freedom of bloom and bright colors.

Alida Lovett Both buds and flowers are large; are of ideal form, are held on stiff stems a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of the petals—a combination that is both novel and beautiful. Pleasantly perfumed.

American Pillar A new single flowering Rose with blooms two to three inches across, borne in immense clusters. Color lovely apple-blossom pink with bright golden stamens followed in autumn with red hips. A great Rose in pots for Easter.

Climbing American Beauty Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought well.

Dorothy Perkins Extremely hardy. Flowers borne in clusters of from six to ten, very double, with prettily, crinkled petals. Pretty pointed buds, beautiful clear shell-pink in color, lasting a long time without fading; sweet-scented.

Dr. W. Van Fleet Flowers when open run four inches and over in diameter. Center is built high, petals beautifully undulated and cupped. Color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center. Flowers full and double,, of delicate perfume; buds pointed.

Excelsa A distinct variety in form, color and habit. The color is an intense crimson-maroon, with tips of the petals tinged scarlet. Flowers are large and double, produced thirty to forty on a stem, and almost every eye on a shoot produces a cluster of bright blossoms.

Eugene Jacquet Handsome truss of fragrant, cherry-red flowers, borne evenly and uniformly in the greatest profusion. It holds the flower unusually long—the color improves with age.

Jacotte Bud large, orange and yellow; flower large, semi-double, open, cupped, very lasting; deep coppery-yellow, tinted red; borne several together on long strong stems; fragrant.

Mary Wallace This is Dr. Van Fleet's masterpiece. Hardy on a line with Washington, D. C. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals.

Paul's Scarlet Climber Vivid scarlet, shaded crimson. Makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

Purity **(Climbing White American Beauty.)** (H. W.) Cross of Silver Moon and Kaiserin Augusta Victoria. A hardy disease resistant variety similar to Kaiserin but of more vigorous growth and greater freedom of bloom. It is much more double than Silver Moon with but a single flower to a stem. Has excellent keeping qualities.

Rosarie **(Pink Tausendschoen)**—Similar to its parent Thousand Beauties, except color, which is a solid deep rose with much large clusters and many blooms.

Tausendschoen A rapid growing, almost thornless, climber of exceptional value and attractiveness. Its innumerable flower clusters show every shade of pink, rose and crimson with white and yellow variegation.

The Beacon A distinct and effective novelty, bright fiery-red with white eye in the way of American Pillar, single and semi-double, produced in large clusters, handsome foliage.

TENDER CLIMBING ROSES

These are not hardy in the North. In the South or on the Pacific Coast, where they stand the winters, nothing can compare with them for beauty of bud and foliage. Are never to be forgotten when seen in full bloom, loaded with thousands of magnificent flowers.

PRICE, YOUNG PLANTS, 15 CENTS EACH; 12 FOR $1.50. LARGE TWO-YEAR-OLD PLANTS FROM 4-INCH POTS, 40 CENTS; 12 FOR $4.00.

Marechal Niel, the Most Popular of All This is one of the Roses that starts rather slowly, and for that reason the best success will be had with the larger plants. This superb Rose is especially recommended for Southern states, requiring little outdoor protection. Rich golden-yellow.

Mrs. Robert Peary, or Climbing Kaiserin The flowers are extra large, full, deep and double; are of excellent substance and produced on long, stiff stems, like a forcing Rose; buds are long and pointed. Pure ivory-white. Fragrance is delicious.

THE HYBRID POLYANTHAS

OR BABY RAMBLER

This charming class of Roses is the sensation of the last few years. They represent the triumph of productive effort among Rose growers in bringing the vivid colors, prodigal freedom and beautiful clustering form of the grand outdoor Rambler Roses into the house for winter decoration. **Price, 15 cents each; twelve for $1.50. Strong plants from 4-inch pots, 40 cents each; twelve for $4.00.**

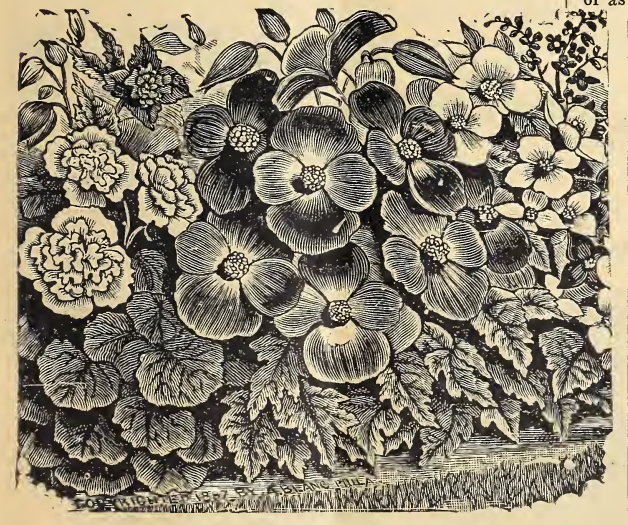
Baby Doll This beautiful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep, glossy green—a very beautiful setting for the lovely little Doll-Roses. It has a neat, compact habit and will make a beautiful little specimen in pots.

Gruss an Aachen Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth this variety is highly recommended for low, bright massing.

Lafayette This brilliant new "Baby Rambler" rose has taken the rose world by storm. Flowers large as "Paul's Scarlet Climber." Produced in enormous clusters as many as forty flowers in a cluster, continuously from June until frost. Color brilliant cherry crimson.

Mlle. Cecile Brunner Makes a handsome miniature Rose coming on stems singly. The bud and flower are both handsome. Color blush, shaded light salmon-pink.

Orleans Rose A charming sort of the true Polyantha type, of clean, vigorous growth, usually brilliant foliage. Flowers are strikingly handsome; a warm geranium-red with center of pure white.



TUBEROUS-ROOTED BEGONIA

The Tuberous-Rooted Begonia is the fashionable plant of the day, and richly does it deserve its honors, for in addition to very handsome foliage, it bears a never-ending profusion of the most ravishingly beautiful flowers the whole summer, and then with the coming of cold weather, very obligingly takes a nap until spring, asking no further care through the winter than to be packed in soil away from frost. The enormous size and intense brilliancy of the flowers astonish those who have never seen any but the ordinary house Begonia. The bulbs can be started from March to June and will be in full bloom. Must be kept from direct sunshine. A good place for them is on the north side of a house or grape arbor.

SINGLE—White, rose, scarlet. **Price, 25 cents; dozen, $2.50.**

DOUBLE—White, salmon, rose, scarlet. **Price, 25 cents; dozen, $2.50.**

Rosa Hugonis.

Rosa Hugonis Unlike any other Rose. It is of shrub-like habit of growth and naturally forms symmetrical bushes about 6 feet high, and the same in diameter, and while not suited to plant in the Rose border, it is an invaluable subject when planted in connection with other shrubs or as single specimens in the garden. Its delicate yellow single flowers are produced on long arching sprays early in May, every branch of the previous season's growth becomes lined on both sides to the very tips. Perfectly hardy. **Plants from 2½-inch pots, 20c each; $2.00 per doz. Large field-grown plants, 60c each; $6.00 per doz.**

GLOXINIA

Magnificent for house culture, producing in great profusion, beautiful flowers of rich and beautiful colors. They succeed best in sandy loam and peat, and require a moist heat.

LARGE FLOWERING—Mixed colors only. Each, 35 cents; per dozen, $3.50.

CHRYSANTHEMUMS

SOME VALUABLE HINTS FOR SUCCESSFUL CULTURE.

THE average householder must depend upon his garden for the Mum show; and is naturally limited to the Earlies, Mid-seasons, Pompons, etc., which will bloom freely during the fall and before winter sets in. The Pompons particularly make charming potted specimens for the house during early winter. If in a locality where frosts are likely to occur before September 15th, it is best to place the young plants in 5-inch pots and sink the pots in the ground; then they can be readily taken up in September without disturbing the roots, and cared for in a protected place. **IF VERY LARGE FLOWERS ARE DESIRED, ALL SIDE BRANCHES EXCEPT 2 OR 3 SHOULD BE KEPT PINCHED OFF; THEN WHEN BUDS APPEAR TAKE OFF ALL BUDS EXCEPT ONE AT END OF BRANCH. THEY MUST BE WELL WATERED, AND KEPT IN A COOL ROOM OR GREENHOUSE, BUT NOT SUBJECTED TO FIRE HEAT MORE THAN TO KEEP OUT FROST.** The small, black flies which attack the stems may be destroyed by frequent sprinkling of tobacco dust or tobacco water.

PRICE, 25 CENTS EACH; FIVE FOR $1.00. (PLANTS FROM 2½-INCH POTS)

Easter Greeting This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. The florets are of a fiery amaranth-red with five regular shaped spots. The first and only kind to bloom as well bedded out as in pots and to do so all summer. The only kind that stands bedding out in groups. It rivals the Azalea in beauty as a pot plant for Easter, and when bedded out in summer will remain in bloom until time for frost in September.

Gardener's Joy The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half-dwarf nature and very sturdy. On account of its rapid, luxuriant growth, it is a very profitable market variety.

Glory This splendid novelty is quite remontant, florets and clusters are very large; ground color blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

Lucy Becker This grand novelty is a sport of Easter Greeting and is like it in everything but color, which is a rosy-pink. It is, if anything, even more free in bloom.

Prince Immensely large flowers, strongly crimped, of fine shape with from six to ten petals, color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

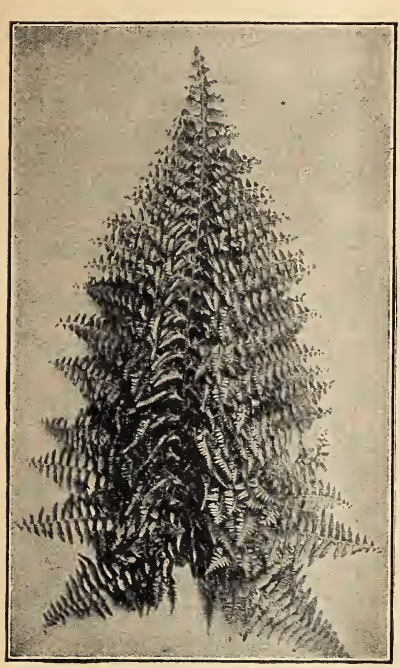
The varieties listed herewith include the newest and most beautiful sorts to date. The ordinary temperature of the living room suits them nicely, and their new growths will soon surprise you with their graceful beauty.



Innisfallen.

Roosevelt Fern.

Any of the following Ferns in nice young plants, 20 cents each; 6 for $1.00. Strong four-inch pot plants, 50 cents each; 6 for $2.50.

THE "ROOSEVELT FERN"

(Nephrolepis Roosevelt)—In general characteristics it resembles the Boston Fern, but with two points of great excellence over that variety. First it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended.

The Popular Boston Sword Fern (Nephrolepis Exaltata Bostoniensis)—In the vicinity of Boston no other plant is used to extensively as this graceful Nephrolepis, which differs from the ordinary Fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern.

"Teddy, Jr." (Dwarf Roosevelt)—A new dwarf form of the popular Roosevelt Fern; a grand compact grower, making splendid specimens in medium size plants.

Ostrich Plume Fern (Nephrolepis Whitmanii.)—An improvement on the Nephrolepis Elegantissima, with still more gracefully divided pinnae, giving the whole plant an airy lace-like appearance; makes beautiful symmetrical plants even in small sizes and large specimen plants are beautiful beyond description.

Nephrolepis Sparrowii We take pleasure in offering to our customers this valuable variety, a true sport of the Neph. Superbissima (or Fluffy Ruffles) Fern. It has the dark green foliage of its parent, which, with its beautiful crested fronds, makes it a most unique, distinct and desirable Fern. One of the most distinguishable features of this Fern is its robustness, which makes it a very rapid and easy grower, a Fern the amateur can grow with success. We recommend this variety most highly.

Verona A handsome new variety of the Elegantissima type, somewhat resembling N. Whitmanii, but with finer "Ostrich Plume" foliage, and with a stiffer mid-rib, which makes the fronds stand up better than most varieties of the Lace Ferns.

New Fern INNISFALLEN

This handsome new variety originated with us. It is of the Elegantissima type, a strong and rapid grower, handsome green foliage, and has a stiff mid-rib which makes the fronds stand up better than most varieties of ferns. It has a distinctness of its own and is most desirable in all respects. **Price, young plants, 25 cents each; large plants, 60 cents each.**

PRICE, 12 CENTS EACH; SIX FOR 60 CENTS; $1.10 PER DOZEN.

Crytomium Falcatum (Holly Fern.) We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the Tremula Fern, it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting quality.

Pteris Wimsetti Green leaves, with the ends very peculiarly twisted. It is one of the best varieties for Fern dishes, being a short, compact grower. Will stand much rough treatment.

CULTURE OF CACTUS

The plants should always be kept more or less dry. However, it is well that the plants be given a light sprinkle once a week; they are able to go for a long period without any water at all and remain alive.

The Cacti may be planted either individually in pots or collectively in bowls.

When the plants are arranged in bowls without drains, the top level of the soil should be above the level of the bowl so that most of the water will run off. Enough will penetrate to moisten the soil. There should never be enough water at any time for the water to stand in the bottom of the bowls. This sours the soil.

Set bulbs 2 to 4 inches deep and 2 inches apart in the drills, single rows 12 inches, and double rows 18 inches apart. Gladioli do well 4 to 6 inches apart each way, when planted in beds.

A grand improvement on Tritoma Uvaria Grandiflora. The flower spikes, which are produced with considerable more freedom than in the old variety, are of gigantic size frequently four and one-half feet high, with heads of bloom over twelve inches long, of a rich orange-scarlet, shading to salmon-rose on the edge; a first-class acquisition. **Price, 30 cents each; 4 for $1.00; 12 for $3.00.**

LYCHNIS (Lamp Flower)

LYCHNIS CHALCEDONICA—Heart-lobed stars of brightest vermilion, arranged in large flat panicles, make this variety as showy as a Geranium. **Price, 15 cents each; 3 for 40 cents; $1.50 dozen.**

HONEYSUCKLES

Price, 20 cents each; 2 for 35 cents; $2.00 per dozen. Large plants, 35 cents each; 2 for 65 cents; $3.50 per dozen.

The dear old Honeysuckle is never out of place, at the rich man's mansion or the poor man's cottage. For a cheap, hardy, robust yet lovely vine, it is the chief standby.

CHINESE EVERGREEN—Blooms at intervals through the summer and retains its foliage late in winter; flowers nearly white.

SCARLET TRUMPET—A strong, rapid grower; blossoms very freely the entire season; bright red trumpet-shaped flowers.

CHINESE WISTARIAS

Flowers in clusters; sometimes gives second crop of flowers in the fall. One of the most popular of our hardy vines, growing very rapidly. Flowers in early spring in long, drooping racemes, resembling in size and shape a bunch of grapes. We can supply two varieties, **Blue** and **White. Price, 25 cents each; six for $1.25.**

STATICE (Great Sea Lavender)

LATIFOLIA—A valuable plant either for the border or rockery, with tufts of leathery leaves and immense candelabra-like heads, frequently 1½ feet high and 2 feet across, of purplish blue, minute flowers during July and August. These, if cut and dried, last in perfect condition for months. **Price, 15 cents each; 3 for 40 cents; 12 for $1.50.**

KUDZU VINE

(Pueraria Thunbergiana) — A twining vine of remarkably rapid growth, attaining a length of 40 to 50 feet in one season from established roots which are hardy, though the vine dies down every winter in the north. Purple pea-shaped flowers. A fine vine for arbors, verandas, etc. **Price, 20 cents each; 3 for 50 cents; 12 for $2.00.**

PYRETHRUM (Painted Daisies)

Too much cannot be said in favor of this grand hardy perennial which will thrive in any good garden soil where there is good drainage and full exposure to the sun. The main season of blooming is in June, but if the old flower stems are removed they will give a fair sprinkling of flowers in the autumn. Shades of pink, white and crimson, mixed colors only. Splendid for cutting, lasting a week in good condition. **20c each; 3 for 50 cents; $2.00 per doz.**

Pyrethrum (Painted Daisy).

Hardy Poppy.

SHASTA DAISY

In growth the plants are as strong as a common field Daisy, very tall, well branched, with fine cut foliage and huge white flowers borne in profusion on long stiff stems. The flowers are pure white with gold center, petals very long and center soft and velvety. It is a very pretty hardy plant and one of the novelties that has come to stay. **Price, 15 cents each; 3 for 40 cents; $1.25 per dozen.**

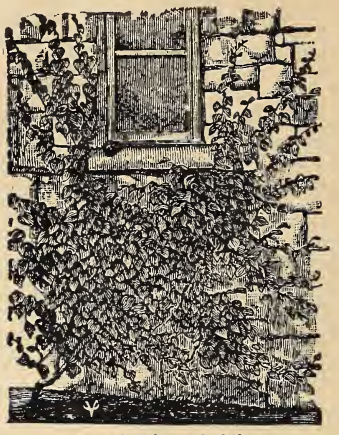
Hardy Ornamental Climbing Vines

Clematis Jackmani and Henryi.

Ampelopsis Veitchii

(BOSTON IVY)

The tendrils of this climbing vine at nearly every point cling firmly to the smoothest surface of rock or wood. The glossy leaves assume in the autumn the most beautiful tints of scarlet and crimson. The handsomest vine possible for growth on house walls. It is quite hardy, but some protection of straw may well be used immediately over the roots in winter. **Price, strong roots, 25 cents each; 3 for 60 cents; six for $1.25; 12 for $2.50.**



Ampelopsis Veitchii.

Clematis Paniculata

We cannot well say too much in praise of this vine. A clean, thrifty, robust-growing vine of graceful habit with attractive glossy foliage, covered in August and September with a sheet of clustered snow-white bloom of the most delicious fragrance. No other vine so completely covers itself with flowers. An arbor or portico over which this Clematis is trained is a wall of white for the time being and what makes it the more striking is that nearly all other vines have ceased blooming at that time. Perfectly hardy, grow rapidly. **Price, 25 cents each; three for 60 cents. Extra large field-grown plants, 40 cents each; six for $2.00.**

Hardy Large Flowering Clematis

The Clematis we offer this season are exceptionally fine. Many failures in the growing of Clematis are the result of too shallow planting; the crown of the roots should be set at least three inches below the surface of the soil. They delight in a rich, cool soil in an open, sunny position. For covering walls, trellises, or verandas, old trees or ruins, or as specimens on the lawn or for massing in large beds on the lawn, they have scarcely an equal, certainly no superior. **Price, for pot-grown plants, 50 cents each; three for $1.25.**

JACKMANI—The flowers, when fully expanded, are from four to six inches in diameter; intense violet purple, with a rich velvety appearance and distinctly veined.

HENRYI—Fine, large, creamy-white flowers. A strong grower and very hardy, one of the best of white varieties; a perpetual bloomer.

MME. EDOUARD ANDRE—Large-flowering red Clematis. A very unique variety, color a beautiful wine-red, large flowers with heavy petals; a fine contrast to the other sorts.

This Oriental Gem of the Far East comes to us a marvel of beauty and fragrance. Its rapid growth, abundant foliage and modest, sweet-scented flowers give it supremacy over all foreign and domestic climbers. The handsome, glossy, heart-shaped leaves and clusters of fragrant white flowers make a window, arbor or veranda a perfect bower of beauty. They stand the severest winter, and burst forth in all their beauty and splendor very early in the spring. No one should miss planting this charming vine. Once planted, it will last a lifetime. These vines makes a long slender root, which should be planted with small end up. **Price of Cinnamon Vine Tubers, or Roots, extra quality, sure to grow. 15 cents each; three for 40 cents.**

HARDY ORNAMENTAL SHRUBS

NOTE—Some customers do not understand why shrubs are received in **dormant** condition, without foliage, etc., and think because they are "dead looking" that they are without life. Of course this impresssion is **wrong** as all hardy growth in our northern country is suspended during winter season, but springs to renewed life when growing time comes.

Planting of Hydrangea "Hills of Snow."

HYDRANGEA "HILLS OF SNOW"

Arborescens Grandiflora

The blooms are very large, of pure snow-white color, resembling a little the hardy shrub so well known, the Snowball, in color and make-up, only they are much larger in size and much more striking. One of the most valuable features is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early June through August, renders it a valuable plant not only to the florist, but to the owner of every garden. It is perfectly hardy, standing twenty degrees below zero. **Price, field grown plants, 12 to 18 inches, 30 cents each; 4 for $1.00; $3.00 per dozen. 18 to 24 inches, 50 cents each; 3 for $1.25; twelve for $5.00.**

New Flowering Shrub from China.

BEAUTY-BUSH

(KOLKWITZIA AMABILIS)

Every succeeding year emphasizes the garden value of this plant for which the descriptive title of Beauty-Bush has been aptly coined.

It is a twiggy shrub, growing from 6 to 8 feet tall, with the inner stems erect or ascending and the outer ones arching to the ground, the whole plant forming a dome-shaped mass. The flowers are produced along the whole length of the branches in clusters at the ends of short, leafy shoots. They are tubular with a gaping mouth, deep pink without, stained with yellow-brown on the lower throat and lip.

The graceful habit of the plant, its free-flowering qualities and pleasing color, combined with perfect hardiness, make this one of the most beautiful, as well as most useful, shrubs that China has given to the gardens of this country, and is destined to become one of the most familiar plants in our gardens. Will do well in full sunshine or partly shaded locations. **Nice young plants, 50 cents each; 4 for $1.75.**

ALTHEA USED FOR HEDGE

ALTHEA or ROSE OF SHARON

It will do well in nearly all locations, except in the extreme cold sections of the northern states. It is a sturdy grower and will flourish where many other shrubs would fail to grow.

In season these shrubs are covered with beautiful flowers, some of them double, which range in color from Blue and Purple to Violet and Red, Flesh color and White. A Hedge of Altheas in bloom is a sight never to be forgotten. They remain in bloom from 4 to 6 weeks, and its bright green foliage makes it a beautiful hedge either in or out of bloom.

If left untrimmed they will make a fine tall screen 6 to 8 feet high. They should be planted 12 inches apart for screen purposes, and about 8 inches when used as a low hedge. They can be kept down as low as 2 feet, with very good results, except that they will naturally produce less bloom as a low hedge, than if left to grow tall.

Few shrubs will transplant as easily as the Althea, and with as little loss. The plants we are offering will make you a good hedge or screen the second year after planting and will reward you each year many times their original cost.

Altheas will do well in almost any soil, but like all other plants, will do best if given good soil. They do not require trimming as often as other hedges. Should be trimmed in spring, before growth starts, to height you wish.

HARDY FERNS

Foundation Planti ng of Hardy Ferns.

These are very useful for growing close to houses and in corners which are too shady for other plants.

Most ferns do best in a light soil containing much vegetable matter, and it is always best to work a considerable amount of leaf mould into the soil of a fern bed. While few ferns grow well in very dry soil, the common notion that they require very wet or almost swampy conditions is not well founded.

While the native ferns are, of course, perfectly hardy, most of them are better off with a light covering of leaves in winter. In their natural habitat, they are usually well covered with leaves and snow throughout the winter.

We offer only the most popular varieties. One each of the 3, postpaid, for $1.00.

CHRISTMAS FERN—It is one of the very best species for growing as an individual specimen and ranks with the Ostrich and the Osmundas in size and vigorous beauty. Plant the crown level with the surface and if massed effects are desired, 12 inches apart. **Each, 35 cents; twelve for $3.50.**

OSTRICH FERN—(Onoclea Strutiopteris.) Growing in a crown, fronds 2 to 4 feet by 6 to 10 inches wide; a very erect, handsome species, graceful as a palm. Use lots of manure, leaf mold or well rotted peat and it will multiply by underground runners, especially so in moist, sandy or peat soil. Plant crown level or one-fourth of an inch above surface and mulch in winter. Its vase-like masses of foliage are dark green and it is one of the tallest of our ferns and should be planted well back. **Price, 35 cents each; twelve for $3.50.**

WATCH-EM-GROW IS FINE FOR FERNS AND OTHER POT PLANTS

LOW PRICED EVERGREENS

Evergreens have a place all their own. There are hardly any two of the same color, and, with a few exceptions, those colors do not vary much the year round— unless the color is lighter in the spring when new growth is made. A few assume attractive bronzy tones in fall, and impart a feeling of substantial desirability to a home or garden surrounded by them, or in which they are freely used. For foundation plantings, covering banks, walls and other objects they are extremely useful.

PRICE—Plants here offered are from 12 to 15 inches high, and we are making the low price of $1.00 each, by mail.

SPECIAL OFFER—One each of the four excellent varieties for $3.50, by express. No Further Premiums or Extras Allowed.

Arborvitae Globosa.

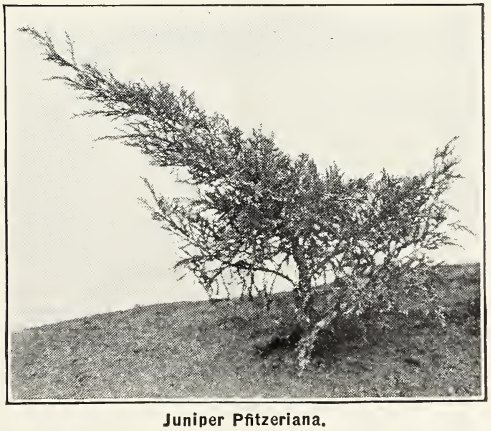
Arborvitae, Globosa Forms a dense, low globe of a handsome shade of green. Useful in low foundation plantings, or bordering high growing evergreens, and unsurpassed where a low, dense hedge is desired.

Arborvitae Pyramidalis.

Arborvitae, Pyramidalis Distinct columnar growth. Is very densely branched with foliage of a glossy green shade. Valuable for groupings, background, hedgings, planted as single specimens, or in pairs; in fact at home in any planting, adding beauty and charm to any situation.

Bioto Aurea Nana.

Biota Aurea Nana We believe this to be the best dwarfish evergreen in cultivation. It is a compact grower with yellow foliage, always shapely and one of the most popular evergreens we have. For lawns, either singly or in groups, borders or banking in front of porches, where small growing sorts are wanted, we know of no other variety so desirable as this splendid sort. It should not be overlooked in the smallest planting, as they are a most satisfactory variety.



Juniper Pfitzeriana.

Juniper Pfitzeriana An evergreen which grows upward and outward, with a graceful droop at the tips. It is impossible to describe its color accurately because of its many shadings, but it has the appearance of deep rich green with traces of blue and gray shadows. Makes a noble appearance.

Dicentra Spectabilis

(Bleeding Heart)

A beautiful perennial, almost lost to our gardens through neglect — No old fashioned garden complete without it—and all new gardens should have it for old times sake.

Price, 60 cents each; 3 for $1.50.

BLEEDING HEART.

Foxglove.

DIGITALIS (Foxglove)

These are among the most satisfactory of our early summer-flowering hardy perennials, succeeding under almost all conditions, and with but trifling attention will give a wealth of flowers during July and August. The Gloxiniaeflora varieties have been used extensively with very good effect, in a number of our larger public parks for naturalizing in shrubberies and other semi-shady situations. This strain embraces a wide range of color from pure white to deep pink. **Price, 20 cents each; three for 50 cents; twelve for $2.00.**

Delphinium (Hardy Larkspur).

NEW HARDY LARKSPURS

The freest and most continuous blooming of all, never being out of flower from the end of June until cut down by hard frost. The clear turquoise-blue of its flowers is not equaled for delicacy and beauty by any other flower. They include all shades of blue from the palest lavender to the deepest purple.

Plants, Price 20 cents each; three for 50 cents; $2.00 per dozen.

Ibolium Privet Hedge.

PLANT A PRIVET HEDGE FENCE

It will cost you less than the cheapest fence you can build.
It will outwear the best fence you can build.
It will look better than any fence you can build.

Ibolium Privet

If California Privet were hardy everywhere, there would be no need of any new variety of Privet. In spite of the fact that California Privet freezes down occasionally, it has become the most popular hedge plant.

The Ibolium Privet however combines all the good qualities of the California Privet with perfect hardiness, making it the best Privet hedge plant on the market today.

It has shiny deep green leaves, holds them till late in the winter, does well in all kinds of soil and in all kinds of locations, grows rapidly and is perfectly hardy.

PRICES OF IBOLIUM PRIVET **We offer plants, 18 to 24 inches high, by mail, postpaid, $2.00 per doz. By express, 25 for $2.50; 100 for $8.00.**

California Privet

There are many plants that can be used with satisfactory results for hedges but the great demand for California Privet proves it to be the most popular of all hedges. When we stop to consider that its cost is trifling when compared with either wood or iron fences and that it will outlive either, the reason for its increased popularity becomes apparent. California Privet can be planted in either single or double rows and should be planted 8 inches apart. 100 plants will make a fence 66 ft. long and using our 12 to 18 inch size would cost only $5.00. The California Privet will hold its leaves thru most of the winter months and can be trimmed to any desired shape. When compared to a mechanical fence of any kind it is a comparison of the living with the dead as your wood and iron fence will rot down whereas the privet will become more beautiful each year. We have had a very favorable growing year and have a better stock of California Privet this year than ever before. Plant a hedge of these and you will never regret it.

The leaves appear early in spring and their bright green color is refreshing and pleasing after a long winter of cold and gloom. In early fall the leaves turn to scarlet and the fruit ripens a bright red, making it a thing of beauty the entire year.

FLOWERING CRABS (MALUS)

The flowers are produced before the foliage, coming in multitudes and almost obliterating the branches. The effect is of a tree clothed in transparent silk gauze, shimmering and changing in color value with the elevation of the sun. The effect is beautiful in single trees or clumps, but is wonderful in hedges. They grow in any soil, and these wonderful trees are deserving of a spot on every homeground.

PRICE—PLANTS 15 TO 18 INCHES, 40 CENTS EACH; $3.75 PER DOZEN. SET OF FOUR FOR $1.25.

Stim-U-Plant

Makes a Wonderful Garden A Plant Food in Tablet Form

THE IDEAL YEAR-ROUND FEEDING METHOD

Feed your plants as you feed yourself. Do not give them breakfast, dinner and supper at one time, for an overfed plant gets indigestion and is harder to get back to healthy growing conditions again than one that has been underfed.

Plants in pots, especially when growing vigorously, soon use up the nourishment that is in the soil, therefore, to keep your plants healthy, feed them about every ten days or two weeks and **avoid the error of feeding too much at one time.**

STIM-U-PLANT TABLETS are an ideal food for potted plants. They are clean, they take up small space and one-quarter of a tablet is enough to use at a time on **small** plants.

EASY TO USE

Simply insert the tablet about one and one-half to two inches below surface of soil at the roots, where it dissolves and produces the qualities which mean the same to a plant as blood to a human being.

Price, postpaid: 30 tablets, 25 cents; 100 tablets, 75 cents; 1,000 tablets, in bucket, $3.50.

The World's Purest, Richest, Quickest-Acting, Most Economical Plant Food and Plant Tonic

SUPERIOR FLOWER SEEDS

GENERAL CULTURAL DIRECTIONS—Most flower seeds germinate well in fine, sandy loam, partly protected from the sun. Heat and moisture are the two essential points to start life in seeds. A general and fatal error is to start the seed too deep; small seeds should be barely covered with fine earth; large seeds by about half an inch. After sowing, the ground should be watered with a very fine sprinkler regularly. Many seeds are killed by drought.

KEY TO SUCCESS IN THE GARDEN.

Success in the cultivation of the majority of either Flowers or Vegetables, is dependent mainly upon the four following fundamental principles:

1st.—Procure good, honest seed.

2d.—Have your soil deep, rich, well drained and pulverized.

3d.—Do not plant your seed before the weather and ground have become thoroughly warm.

4th.—Keep the soil well cultivated, loose and free from weeds during the growth of the plants.

Attention to these principles will certainly insure success, unless some unforseen accident occurs.

HOME VEGETABLE COLLECTION 25 CENTS

Specially Selected for Town and City Home Gardens

Most people residing in towns and cities have not time or room sufficient to grow an extended garden. But vegetables fresh from the home garden are so far superior to those which can be purchased that we have made a special list for city people. One packet each of the following in full-sized packets, postpaid for 25 cents.

RADISH—Long scarlet.
TURNIP—Purple top.
LETTUCE—Early Curled Silesia.
BEANS—Kentucky Wonder.
CUCUMBER—Early White Spine.
BEET—Egyptian.

SWISS CHARD LUCULLUS

The plants grow to a height of two to two and one-half feet. The stalks are as thick and broad as those of Rhubarb, being one and one-half inches broad, heavily ribbed and from ten to twelve inches long below the leaf. These stalks are delicious when cooked and served in the same manner as Asparagus. The extra large leaves are sharply pointed at the top, while the texture is heavily crumpled or "savoyed," more crisply tender and of finer flavor. The leafy portion of the foliage is cooked and served in the same manner as Spinach. The leaves and stalks served as separate vegetables afford two distinct dishes from the same plant at one time. **Per packet, 5 cents; ounce, 20 cents.**

BRUSSELS SPROUTS, or MINIATURE CABBAGE

If more widely known, the Brussels Sprout would be as popular as it is valuable; few people appreciate its full worth as a winter vegetable. The small cabbages grow on stalks in great profusion. Sweetheart remains a long time in good condition after being ripe. **Pkt., 5c.; oz., 15c.; ¼-lb., 40c.**

VELVET LAWN GRASS MIXTURE

Nothing adds more to the attractiveness of a home than a well-kept, close, velvety lawn. Our lawn grass seed is the very best quality mixture of the finest varieties of natural grasses, embracing such as are of neat growth, hardy and best adapted to produce a permanent and fine turf. The quantity of seed required per acre is from three to four bushels. One quart will sow a space of 15x20 feet, or 300 square feet. Our Velvet Lawn Mixture is a compound of grasses that ripen successively, thereby always presenting a green and cheerful appearance. Lawns sown with only one or two grasses turn brown under our hot sun, and remain in that condition until the cool months of autumn revive them. Our mixture can be relied upon to produce the best results. **Price, pound, 60 cents, postpaid; by express, five pounds or more, 50 cents per pound.**

SHADY PLACE LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. The grasses used in making this special mixture are only those that are well adapted for growing in shade. **Price, 75 cents per pound, postpaid. By express, 5 pounds or more, 60 cents per pound. A pound of grass seed is about one and one-third quart.**
